| Redding, CA

<https://jakemsr.dev/>

Software engineer with experience ranging from low-level systems development to modern full-stack web applications. Former committer in the OpenBSD project, working on hardware support, device drivers, and USB/audio subsystem development in C. Recently completed intensive training in full-stack web development and have built multiple projects using React, TypeScript, Firebase, and related technologies. Bringing both deep technical foundations and 20 years of experience running a successful self-employed business.

## Professional Experience

### [OpenBSD Project](#)

[June 2006-September 2011](#)

#### ***Kernel developer (Open Source)***

- Contributed kernel-level C code as an official OpenBSD committer with well over 100 commits.
- Developed hardware support and device drivers, with a focus on the USB and audio subsystems.
- Collaborated with Theo de Raadt and other core developers to design and implement suspend/resume support for the audio and USB stacks.
- Investigated and resolved low-level hardware compatibility, driver, and kernel issues across multiple architectures.
- Collaborated with Alexandre Ratchov to develop a new audio API, sndio, to replace existing API across kernel and userland.
- Participated in code review, debugging, and long-term maintenance within a large, collaborative open-source operating system.

### [Self-Employed Artist/Business Owner](#)

[March 2005-Present](#)

#### ***Independent business***

- Managed all aspects of a successful self-employed business for 20+ years.
- Worked directly with clients to define requirements and deliver custom projects.
- Managed multiple concurrent projects while meeting deadlines and maintaining client relationships.

## Projects (personal)

**Search API Project:** <https://movie-finder-sigma-two.vercel.app/> | <https://github.com/jakemsr/movie-finder>

#### ***Created a fully functional search platform for movies***

- Engineered & integrated a search api for movies with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase movies on an individual route.

**AI Skincare Project:** <https://skintrinsic.vercel.app/> | <https://github.com/jakemsr/skintrinsic>

#### ***Developed a front-end for AI assisted skincare***

- Given Figma designs, developed a fully responsive website where users either take selfies with their webcam or upload existing pictures of themselves and receive analyses of user skincare concerns via RESTful APIs.

## Technical Skills

**Programming Languages:** TypeScript, JavaScript, HTML, CSS, C, C++, Java, SQL

**Frameworks:** React, TailwindCSS, Firebase, NextJS, Redux, Better Auth, MongoDB, REST APIs

**Tools & Other platforms:** Vercel, Cloudflare Worker, GitHub, Vite, VsCode, GitHub Copilot, Jest, Stripe

## Education

FES Institute | [Certificate](#)

[February 2026 - July 2026](#)

## Other

**Interests:** I enjoy hiking, biking and resistance training.

**Referees:** Provided upon request
